Benabec Architectural Cast Stone Design Specification

Materials of Construction

1. Portland Cement: ASTM C 150 Type 10 ; Colour to be white or gray as required to achieve proper colour match as determined by customer specifications.
2. Aggregate: ASTM C 33 ; Coarse and fine aggregate may be white or darker in colour as required to achieve proper colour match as determined by customer specifications.
3. Pigments: ASTM C 979; Inorganic, non-fading, resistant to lime and other alkalis. Pigments not to exceed 10% of cement weight.
4. Water: Potable, free from foreign materials in amounts harmful to concrete or steel within the casting.
5. Air Entrainment Admixture: ASTM C 260
6. Reinforcement: Reinforcing bars as necessary for safe handling, setting and structural stress and where specified by customer will be epoxy coated. The size of the reinforcing shall be a minimum area of steel equal to one quarter of one percent of the cross section area.
7. Surface Colour: Match sample on file in architect's office when applicable.

Custom profiles and sizes available.

Benabec

Architectural Products

Specifications

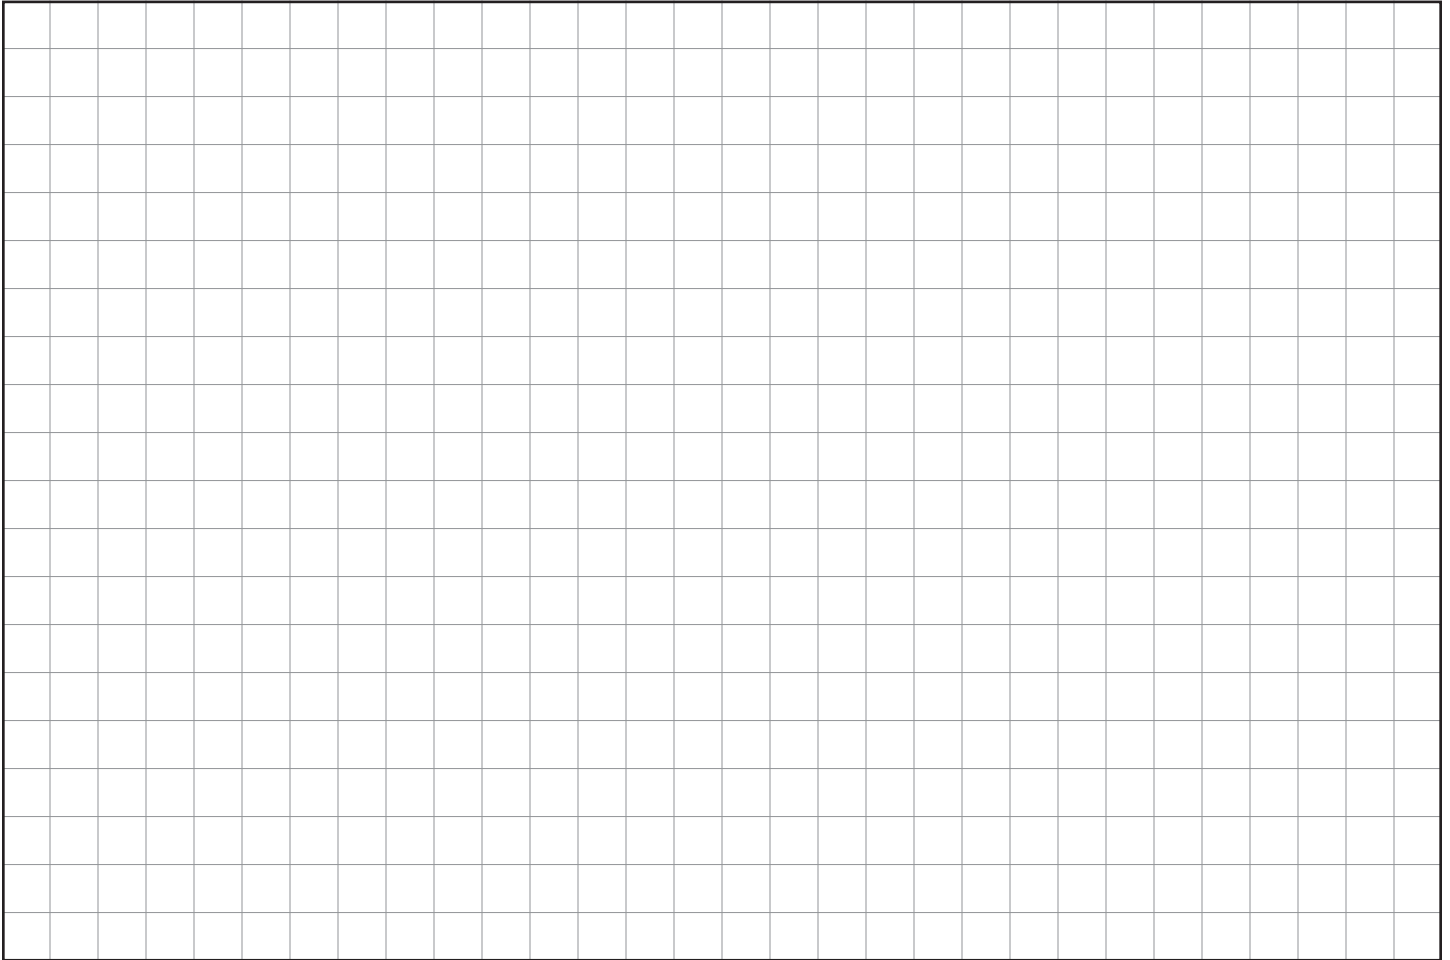

8. **Surface Finish:** Units shall exhibit a texture approximately equal to the approved sample when viewed under a direct daylight illumination at a distance of 10 ft. (3m) distance.
All surfaces intended to be exposed to view, shall have a contiguous texture as specified by customer or as submitted for approval to architect. There shall be no voids in excess of 1/32 in. and not be obvious from a distance of not less than 5 ft. Minor chipping resulting from shipping, shall not be grounds for rejection. Minor chips shall not be obvious from a distance of 20ft. in direct daylight illumination.
The occurrence of crazing or efflorescence shall not be cause for rejection.
9. **Curing:** Cure elements in a moist area of as close to 95% relative humidity as reasonable for approximately 12 hours at a minimum of 70 F after casting. Additional yard curing of 7 days at 50 F or 5 days at 70 F .
10. **Manufacturing Tolerances:** Cross section dimensions, overall length of units or warp, bow and twist of units shall not deviate by more than +/- 1/8 in. from approved dimensions.
11. **Examination:** It is the responsibility of the customer, upon receipt of units to examine them for approved finish and fit. Do not set unacceptable units. Once defective or unacceptable units have been set it is the sole responsibility of the contractor/customer to cover all replacement costs to be incurred.

Custom profiles and sizes available.
